

You're invited to a **Storywalk™**

We hope you enjoy our newly installed Storywalk™ by walking along the trail and reading the book with your child! The story walk begins at the entrance to the park.

Welcome to our Storywalk™

The StoryWalk™ Project was created by Anne Ferguson of Montpelier, VT and developed in collaboration with the Vermont Bicycle & Pedestrian Coalition (VBPC) and the Kellogg Hubbard Library. This project was funded by the Clarke County Education Foundation.

We hope you enjoy our newly installed Storywalk™ by walking along the trail and reading the book with your child!

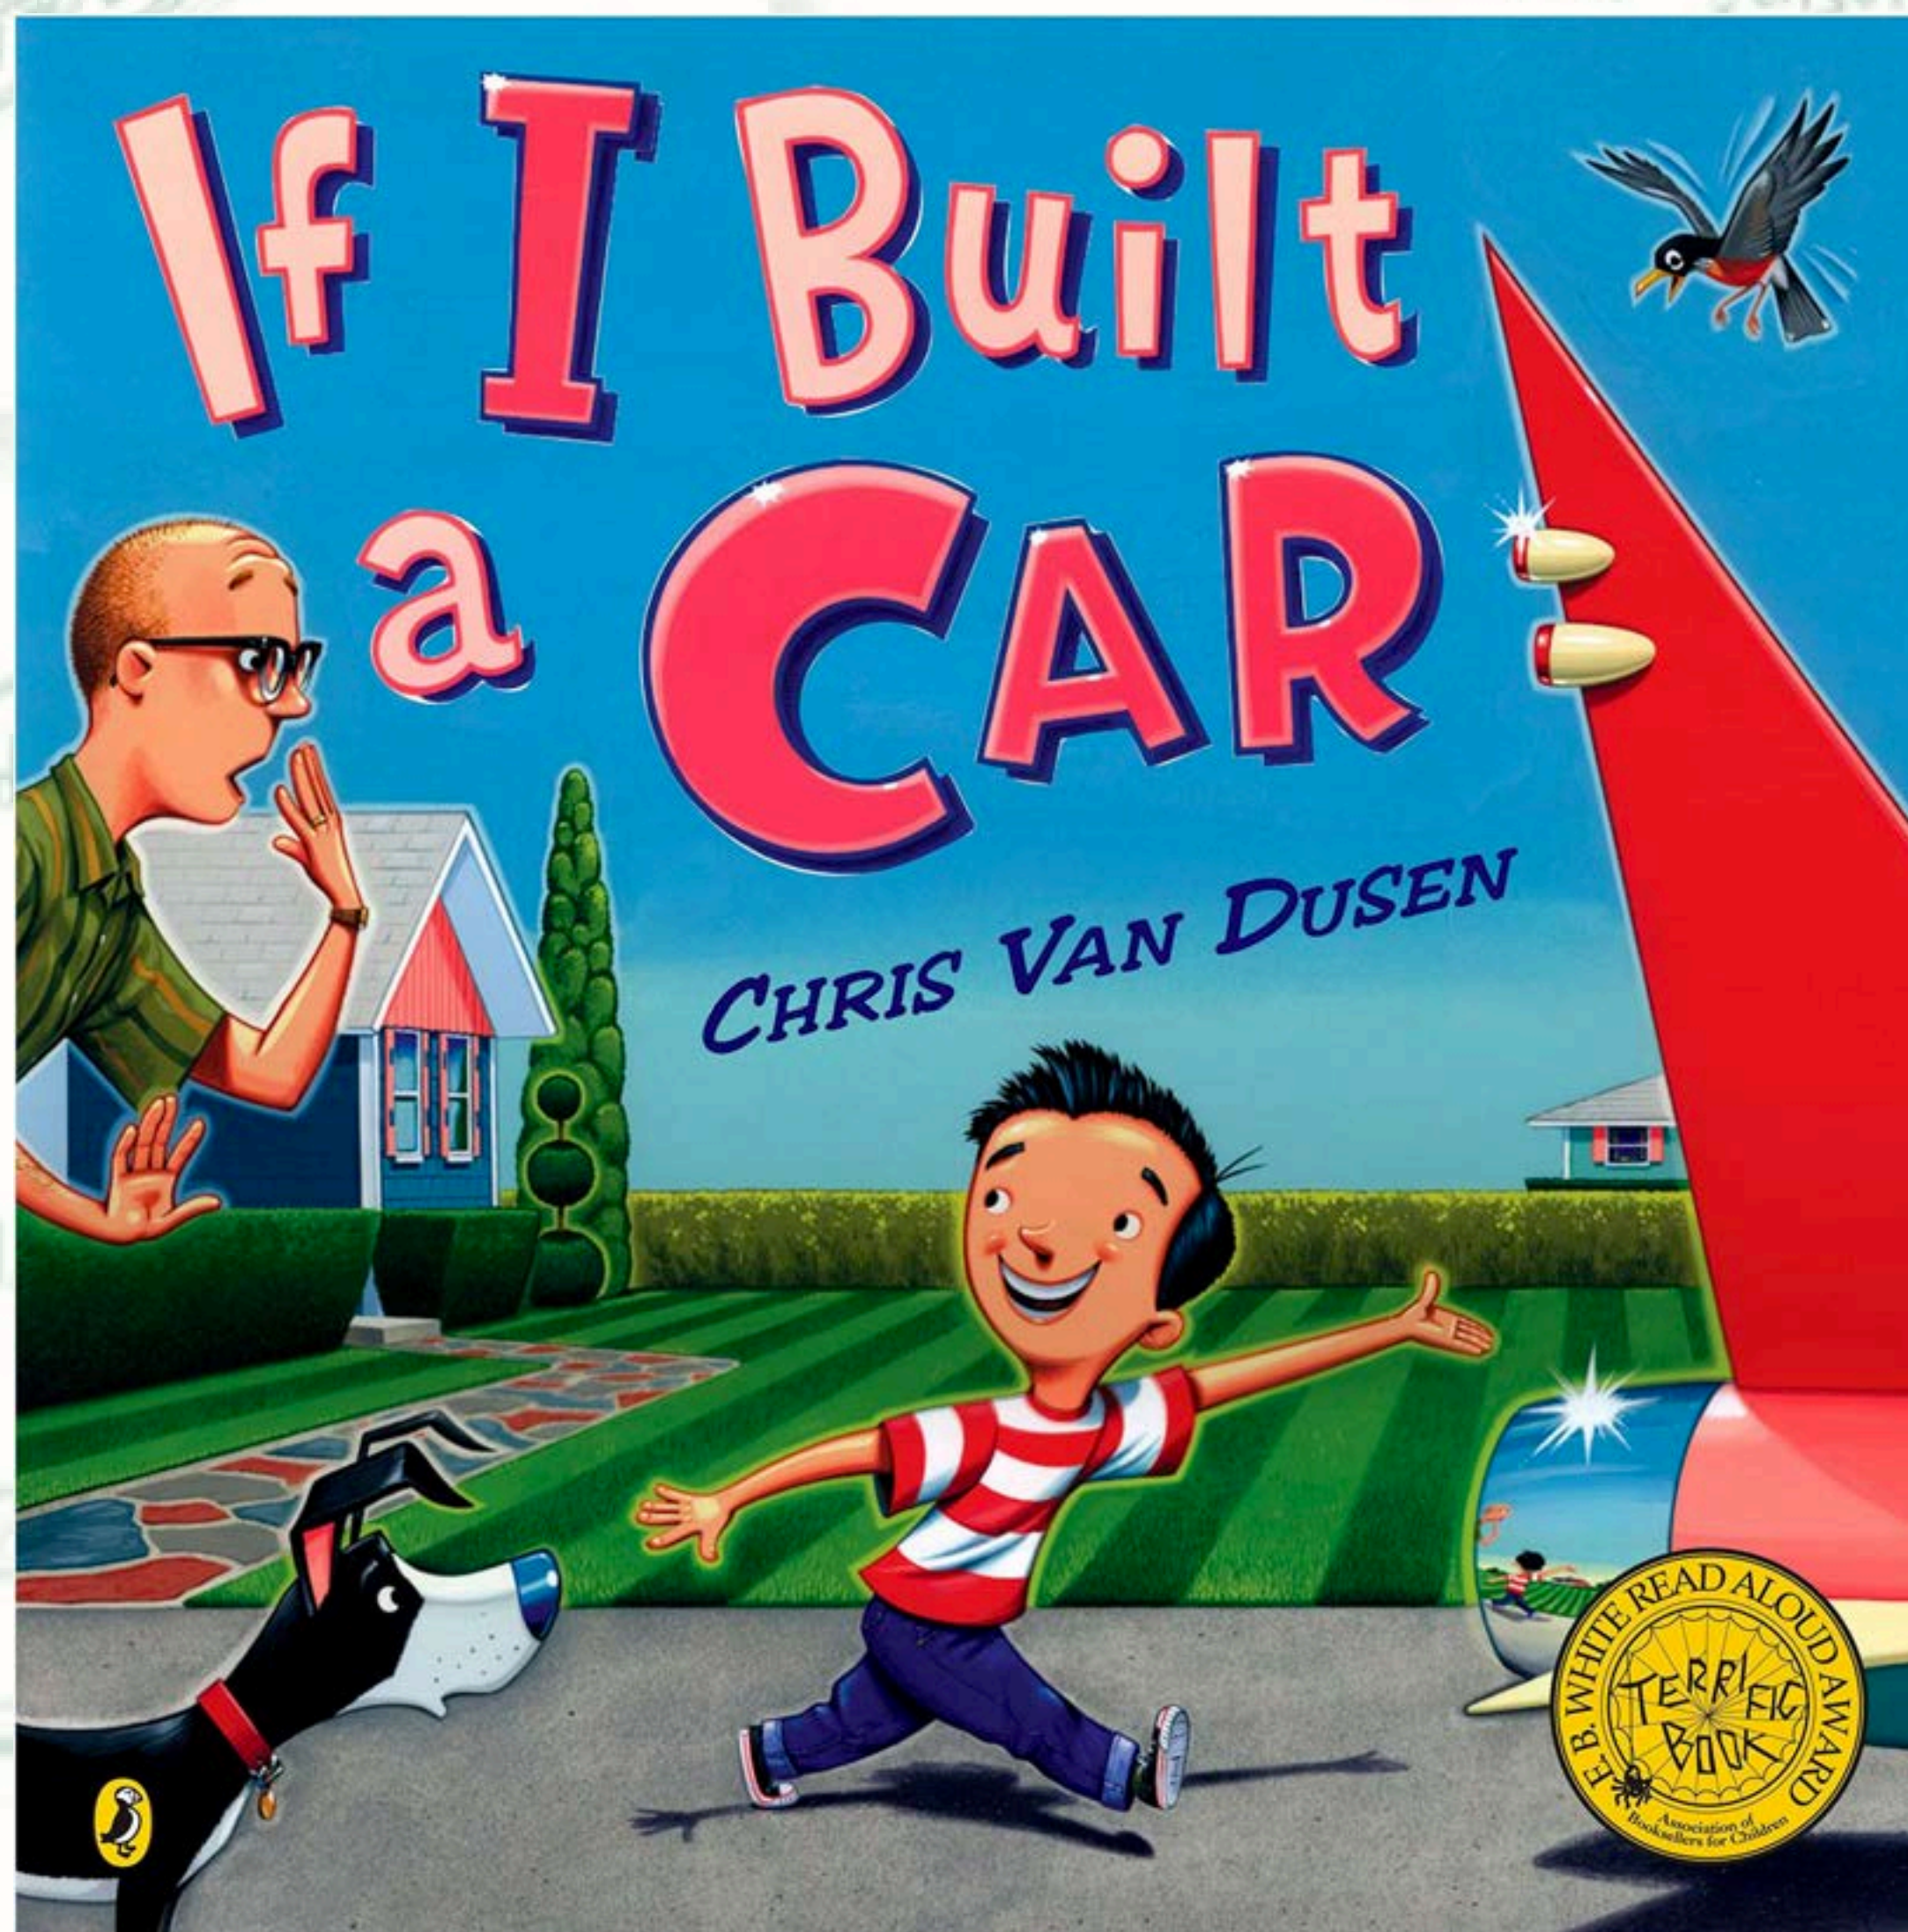

Don't forget to take a
selfie & tag us on
social media!

Jack, from the backseat, said to his dad,
This car is OK. This car is not bad.
But it's just a car. Nothing great. Nothing grand.
It's nothing at **all** like the car **I** have planned.

2

A car is one type of transportation.
Name 5 different types of transportation.

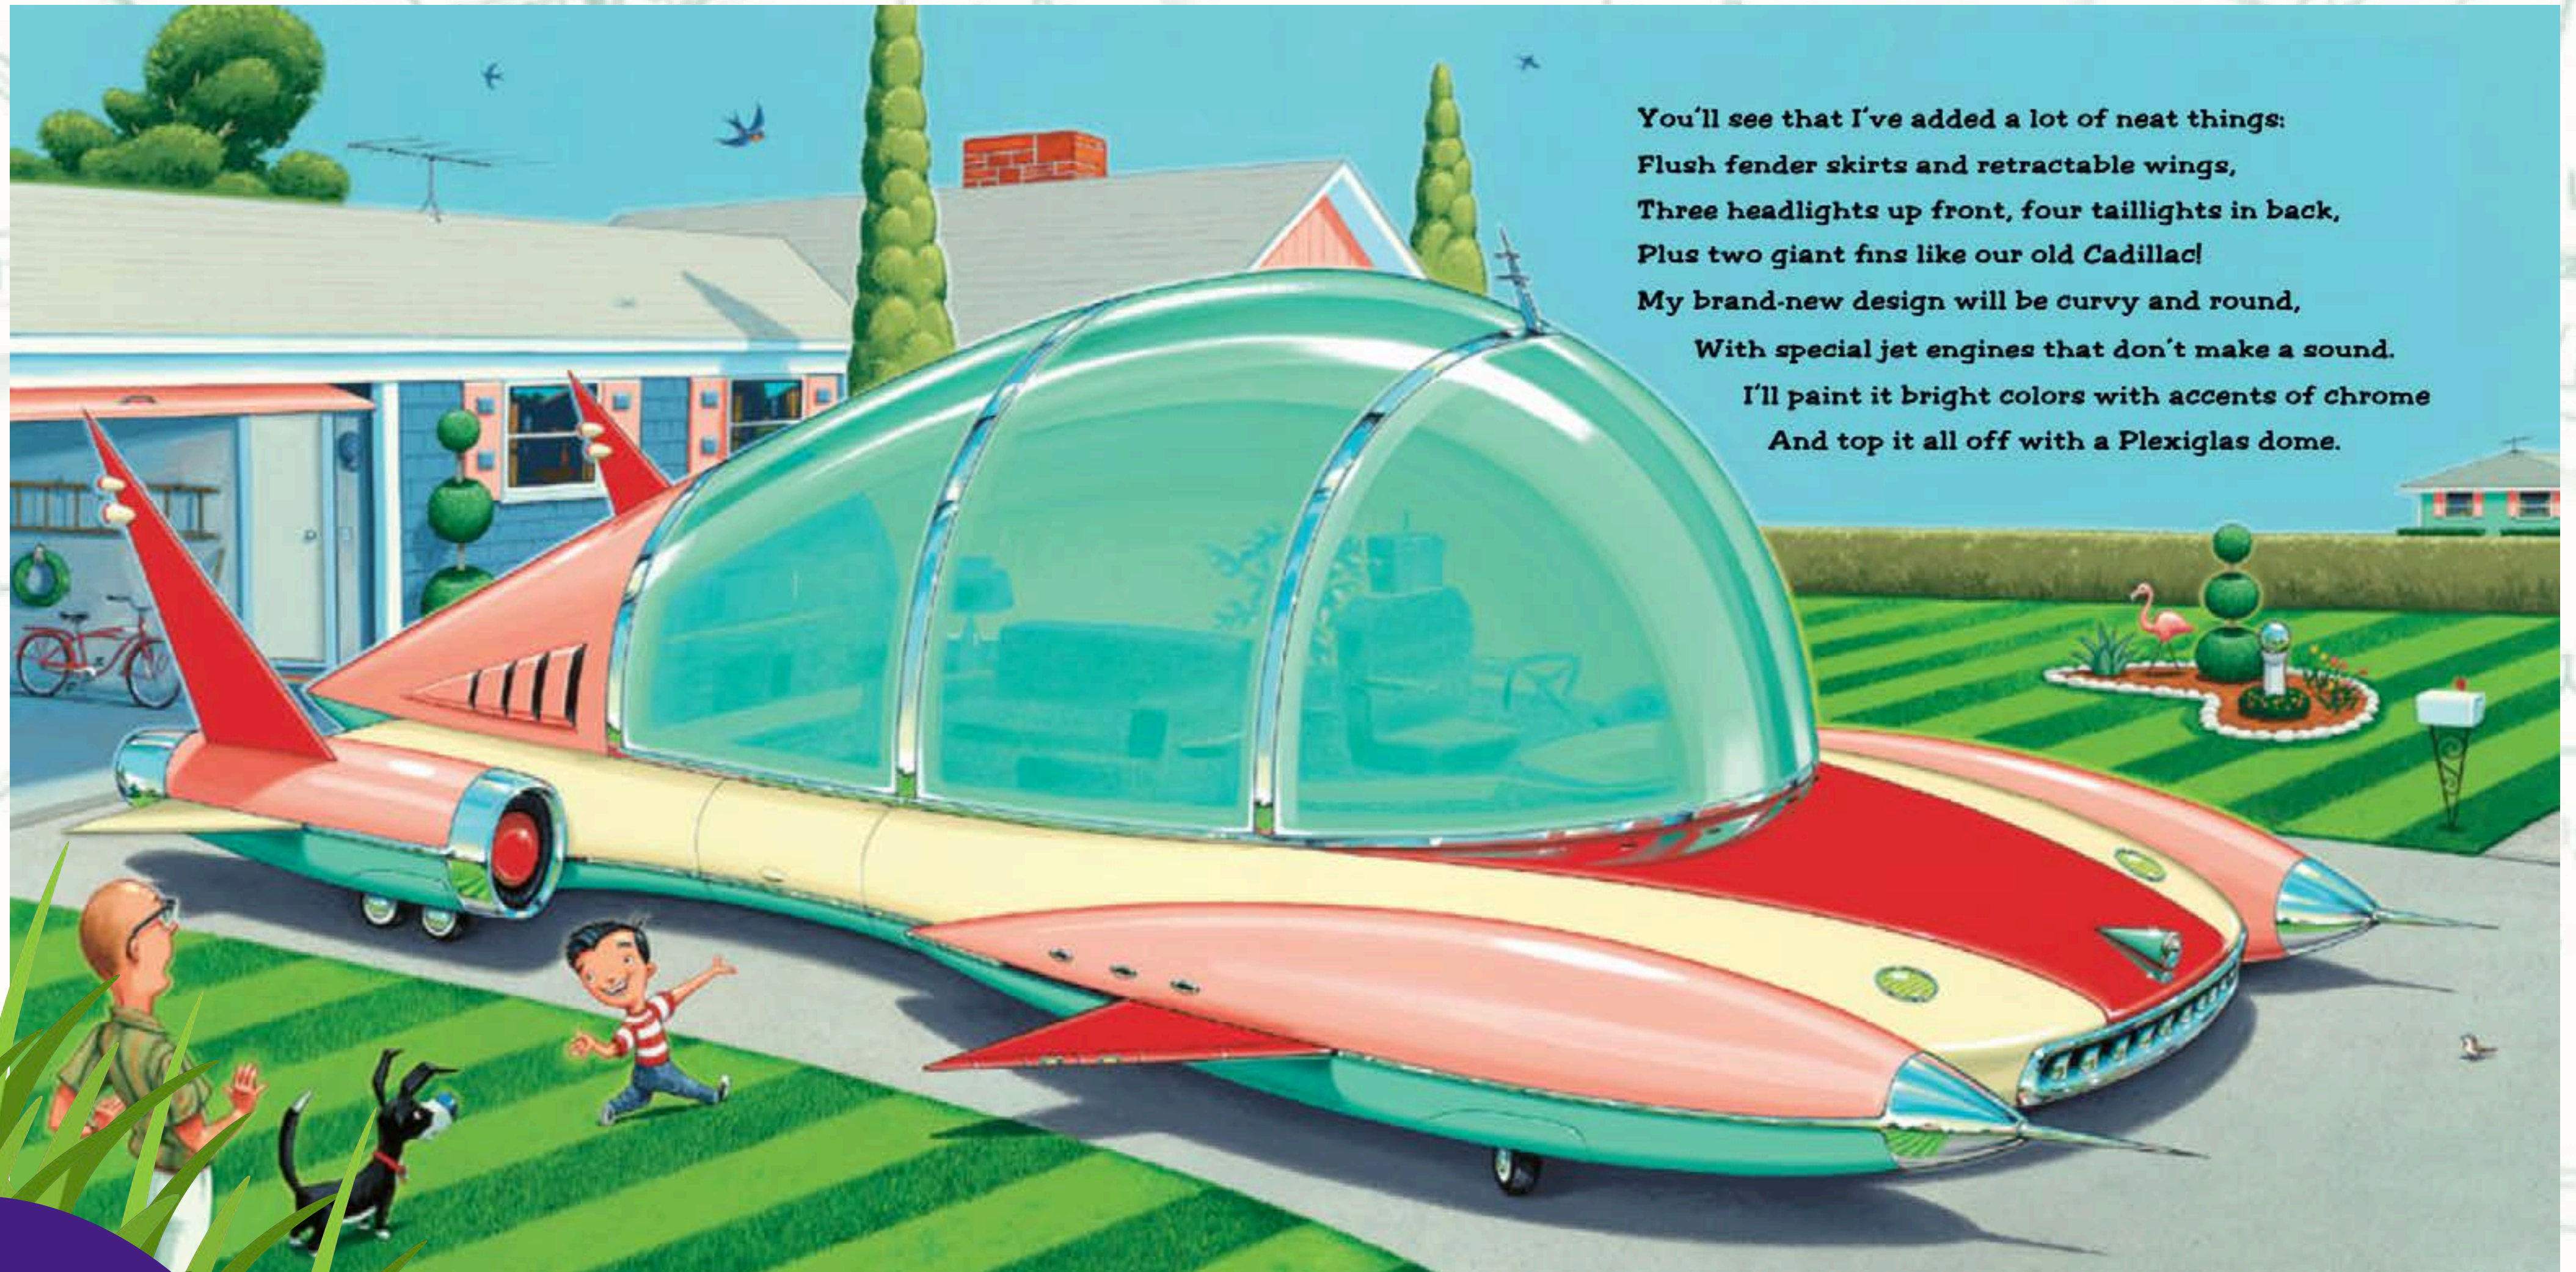

I'll work through the night to create a design—
Constantly analyze, tweak, and refine.

I'll study jet rockets and look at old planes,
Contemplate buses and zeppelins and trains.
To make it as smooth and as sleek as an eel,
I'll borrow ideas from the Wienermobile!

So sit back, relax, stay right where you are.
It's time to reveal my spectacular car!

3

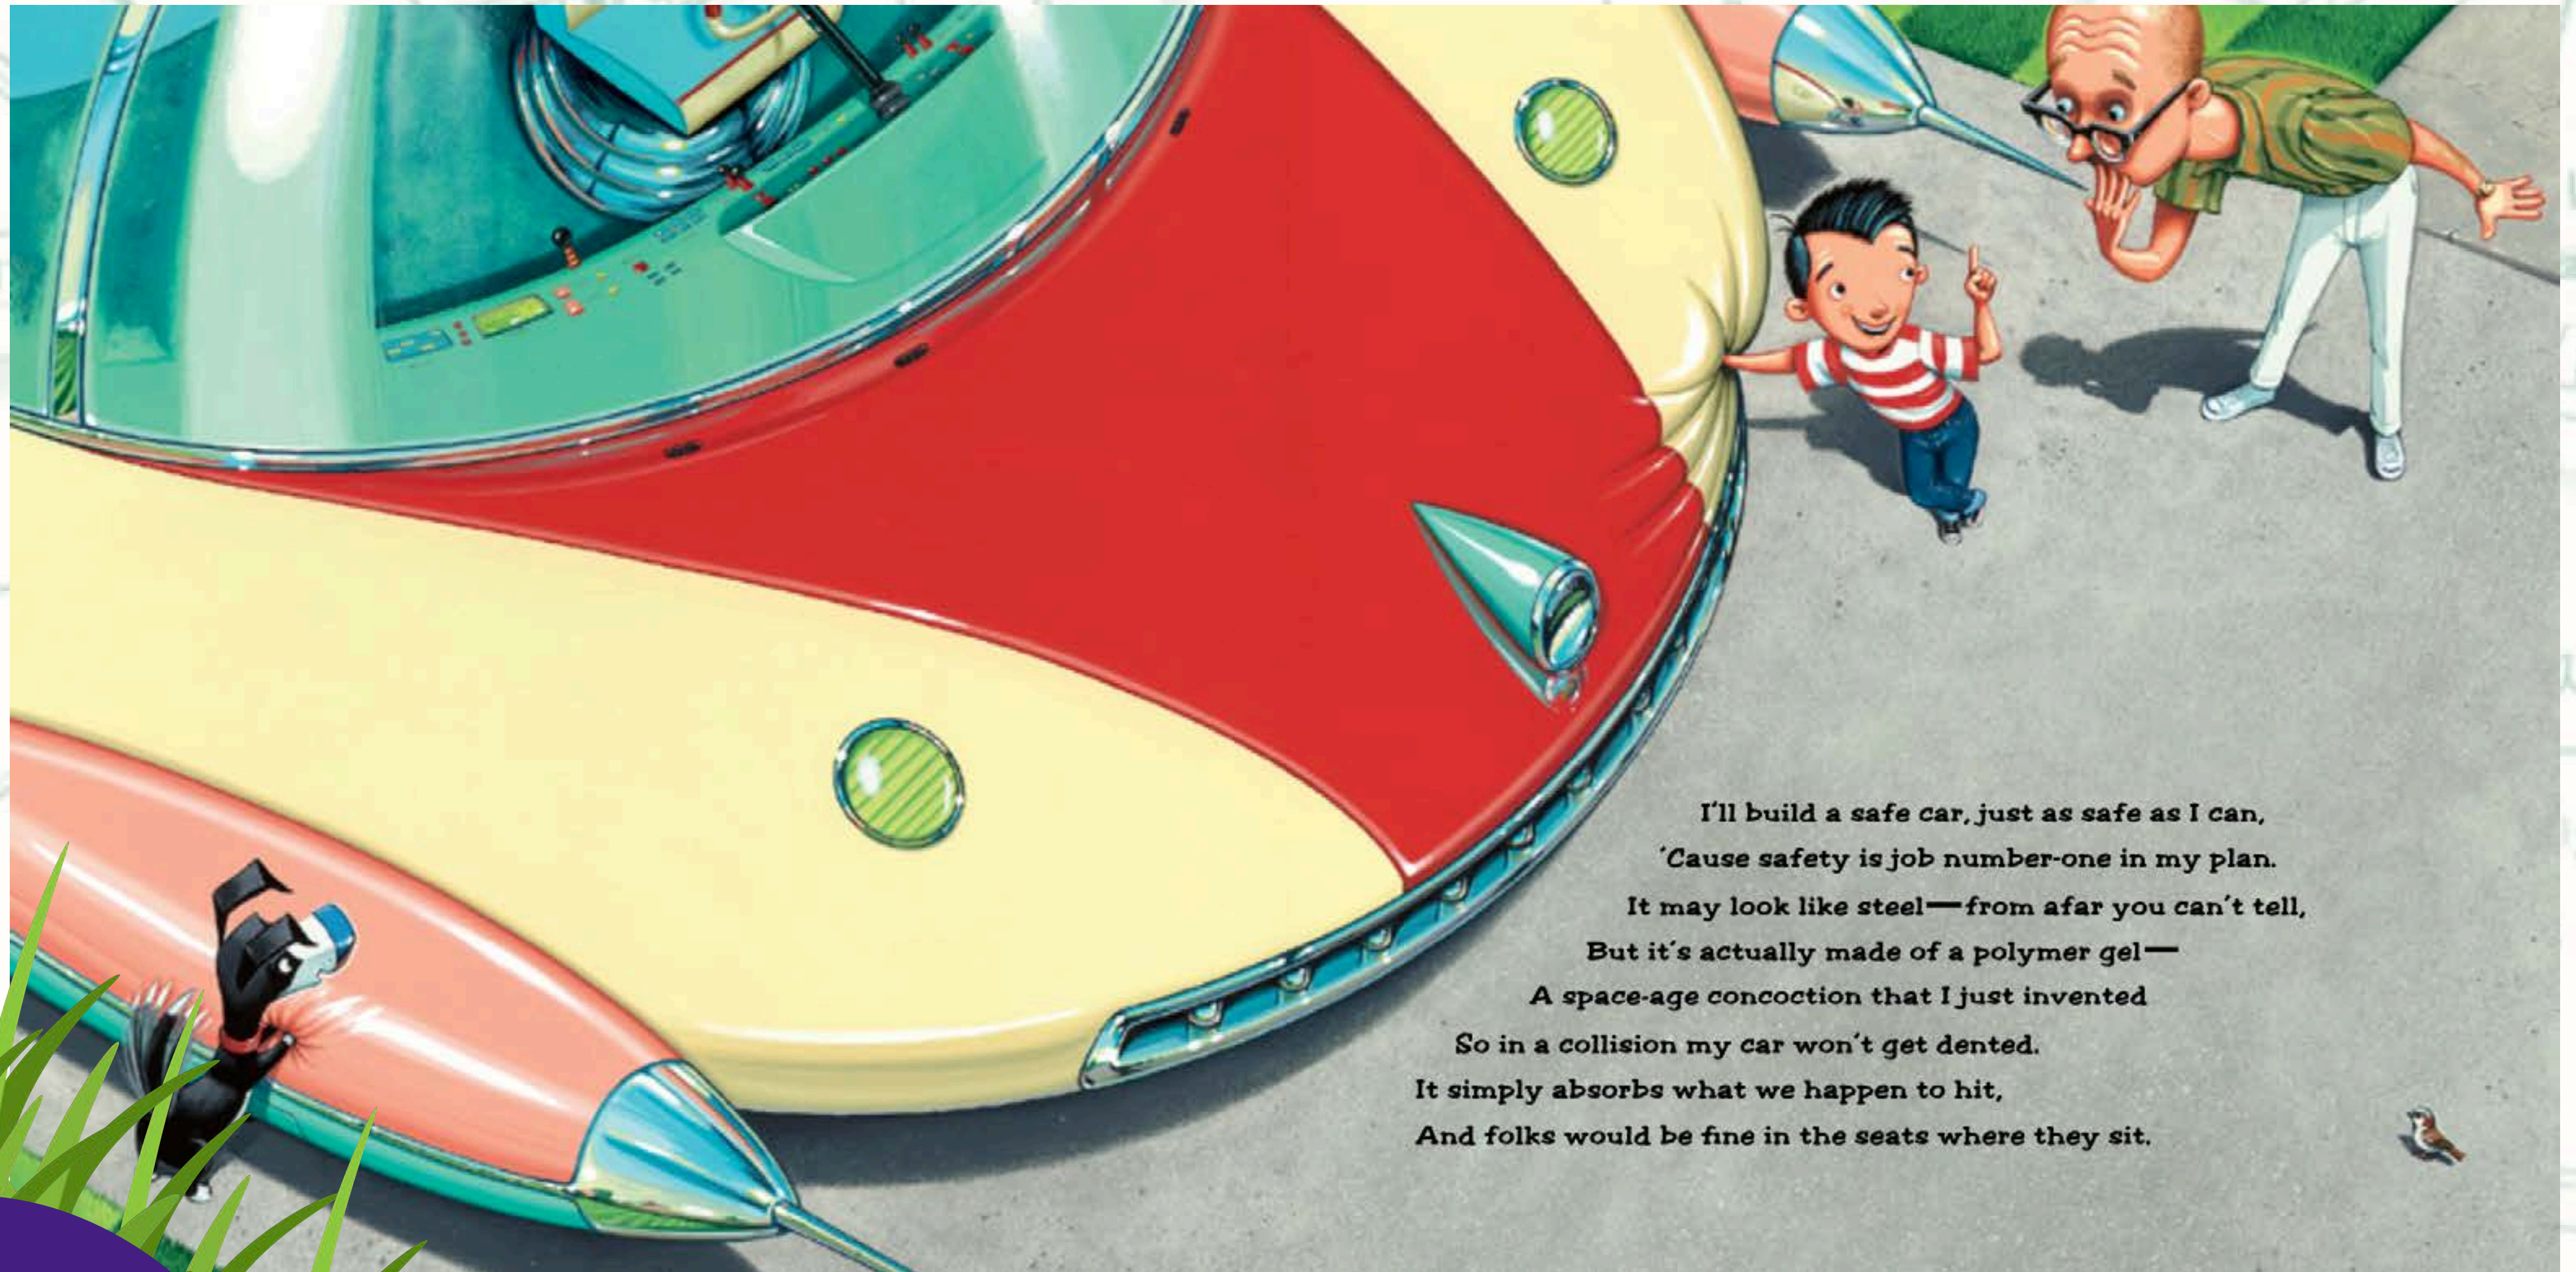

Jack designs his car to be as smooth and as sleek as an eel. What is an antonym for smooth?

You'll see that I've added a lot of neat things:
Flush fender skirts and retractable wings,
Three headlights up front, four taillights in back,
Plus two giant fins like our old Cadillac!
My brand-new design will be curvy and round,
With special jet engines that don't make a sound.
I'll paint it bright colors with accents of chrome
And top it all off with a Plexiglas dome.

4

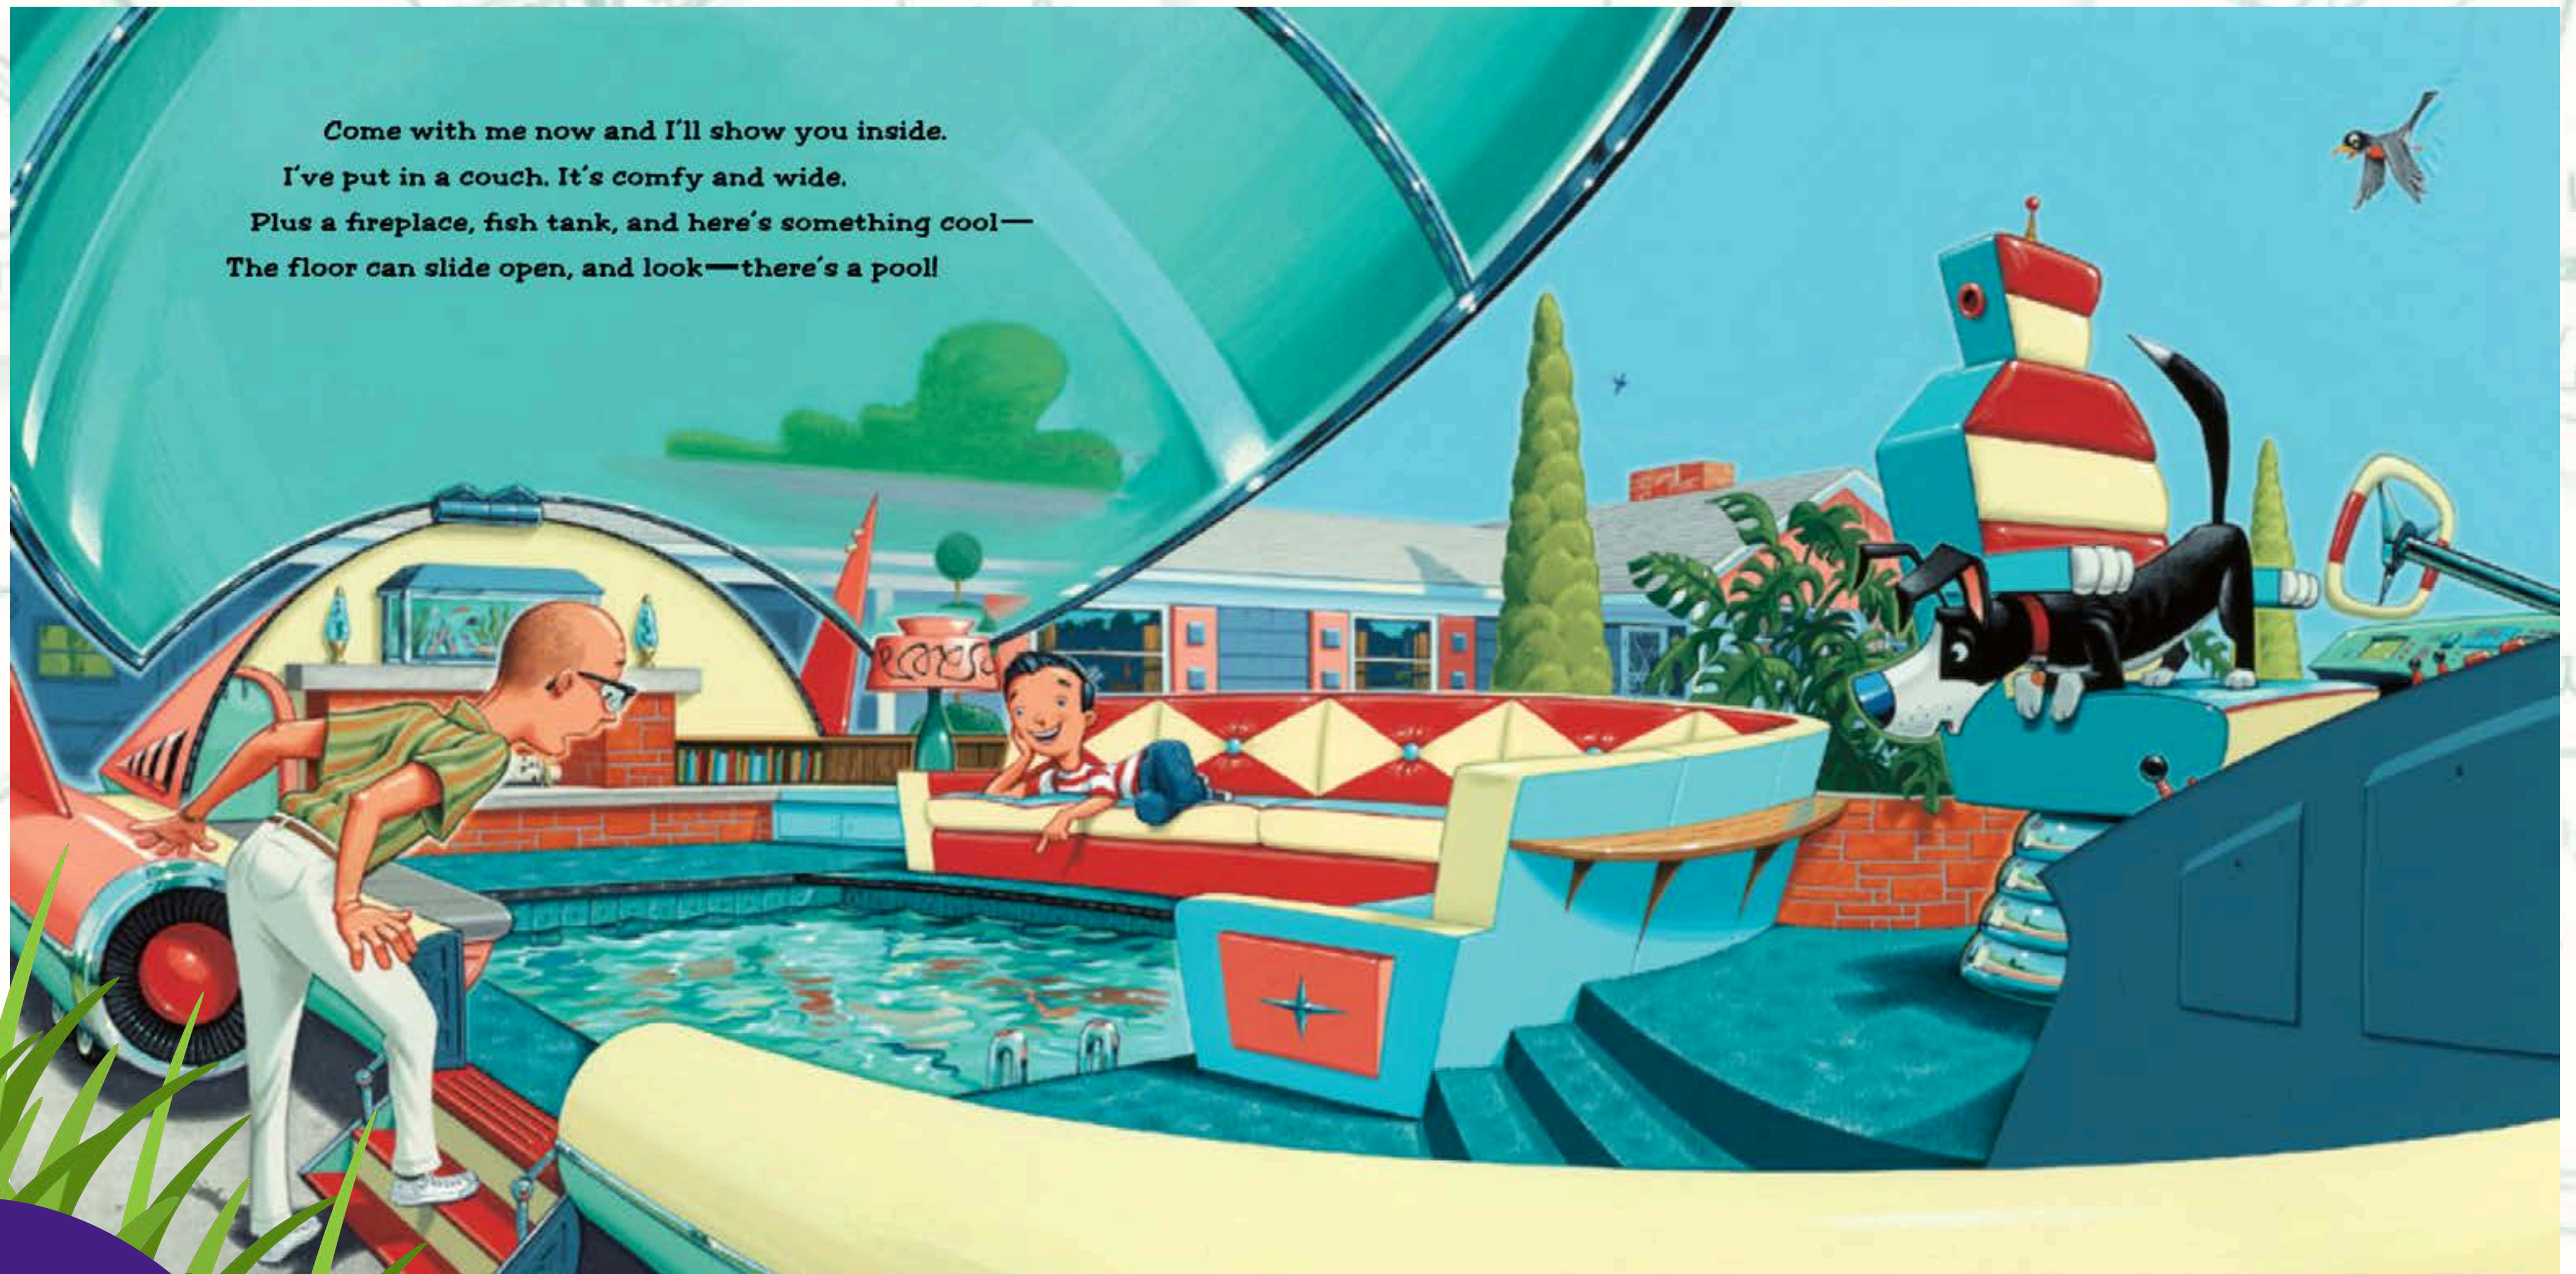

Jack's car design is curvy and round. Which shape is round? A. Square B. Circle
Name 5 things that you can find in your house that are in the shape of a circle.

I'll build a safe car, just as safe as I can,
'Cause safety is job number-one in my plan.
It may look like steel—from afar you can't tell,
But it's actually made of a polymer gel—
A space-age concoction that I just invented
So in a collision my car won't get dented.
It simply absorbs what we happen to hit,
And folks would be fine in the seats where they sit.

5

Jack designed a safe car.
What is in a car that keeps us safe?

6

The water in the pool is:
A. Solid B. Liquid C. Gas

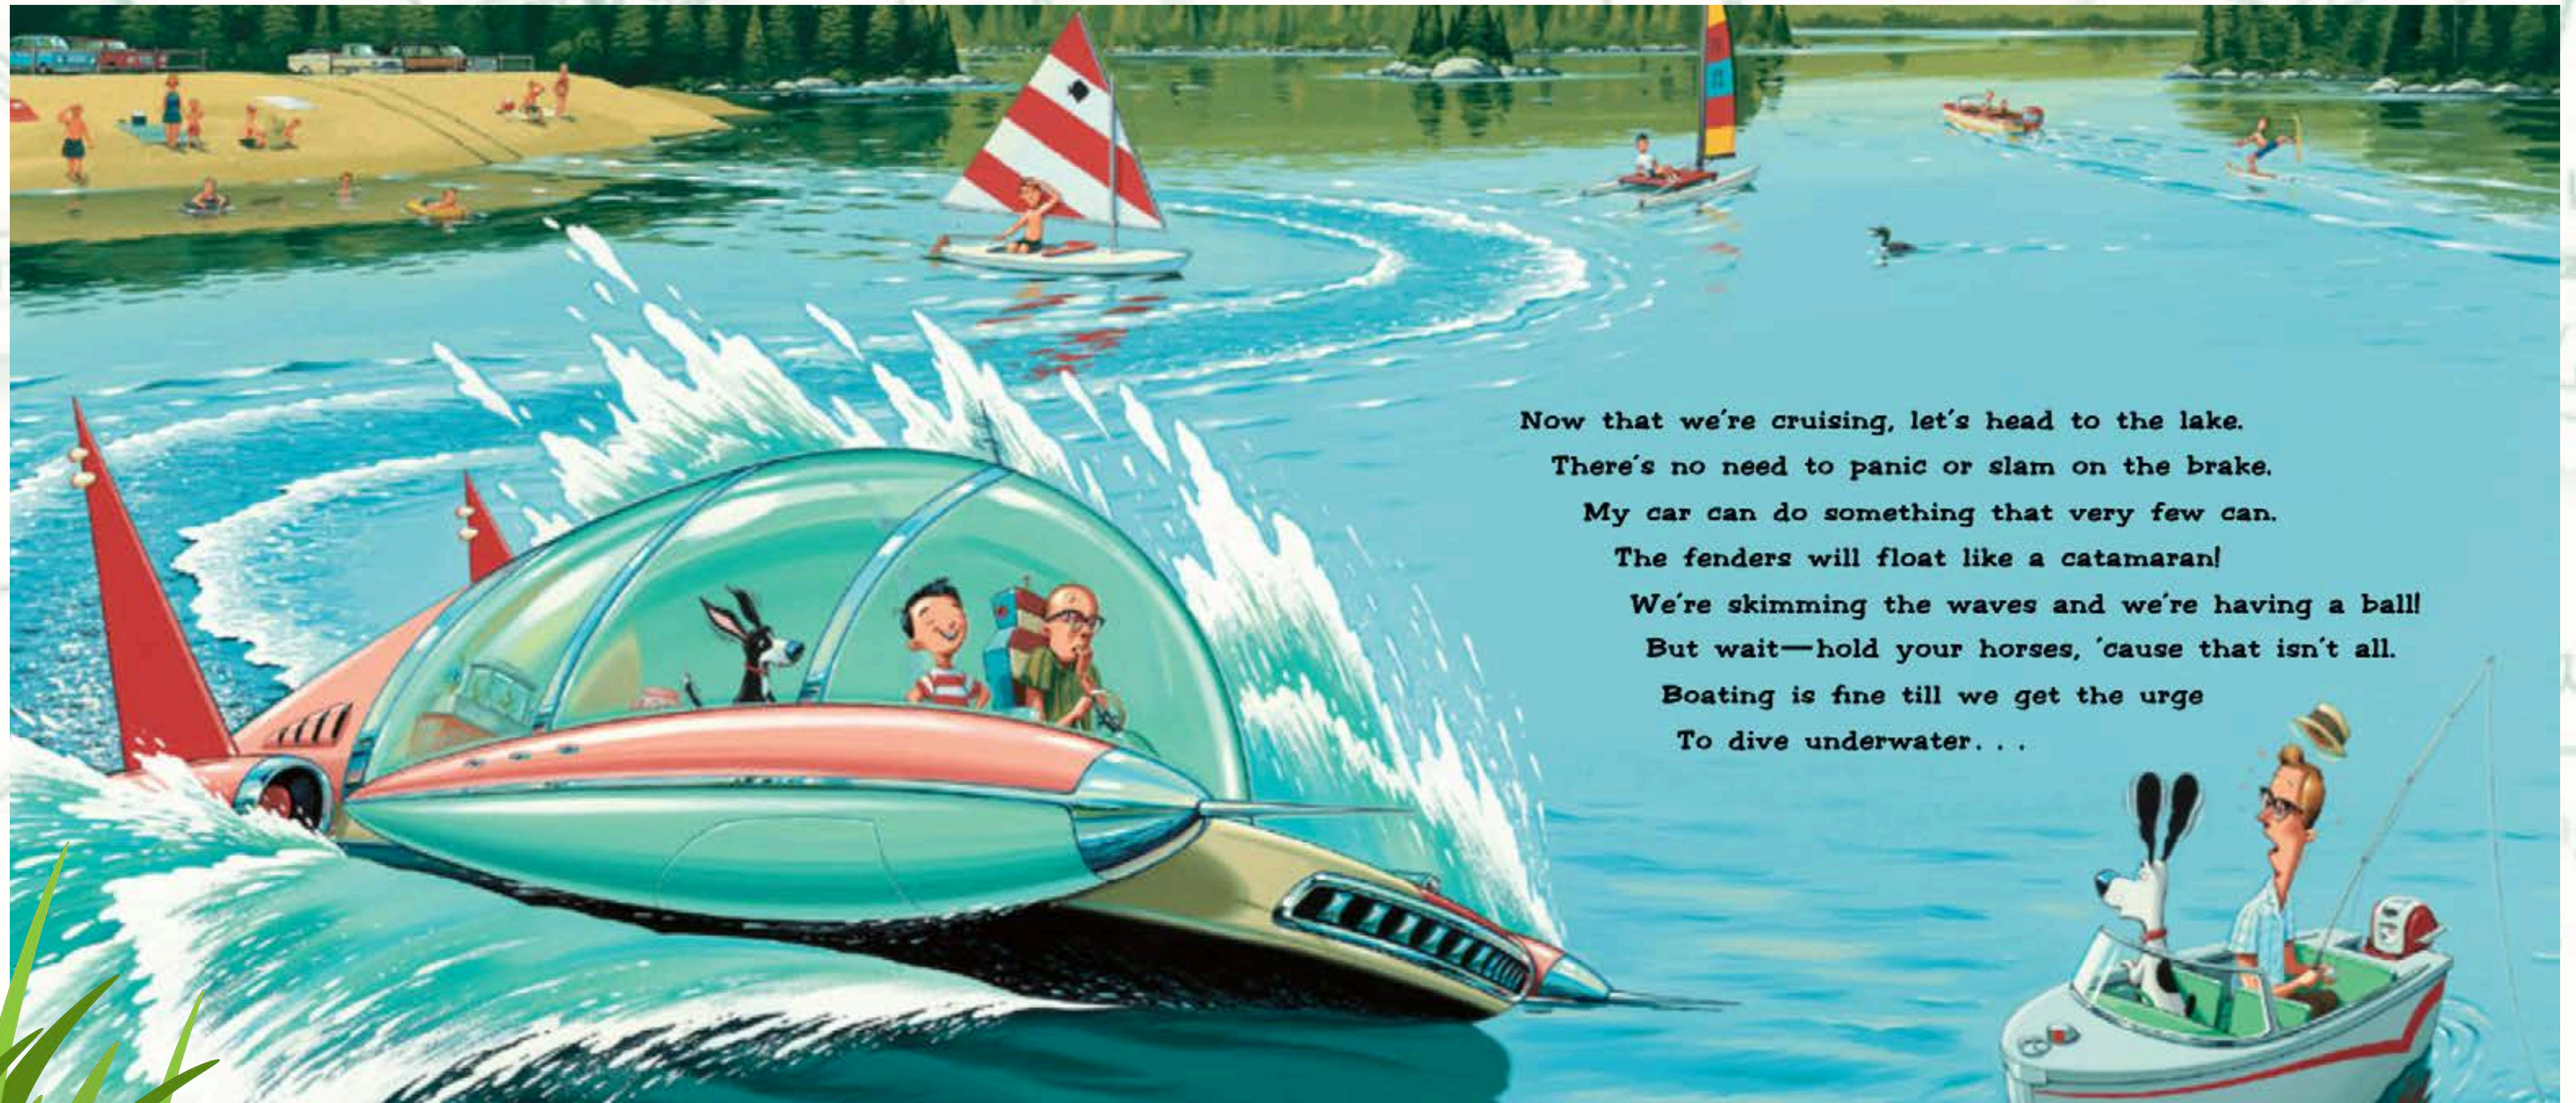

After you've eaten you might like a nap,
And Robert the Robot makes napping a snap!
I've built him right into the back of the chair.
He's out of the way. You won't know that he's there.
But when you get sleepy and rise from your seat,
The chair spins around without missing a beat.
Robert the Robot will take the controls ...
And he's guaranteed not to hit telephone poles.

I see you're impressed with all that's inside,
So start up the motor. Let's go for a ride.

7

The chair in the car spins. What type of motion is shown by the chair?
A. Circular B. Back & Forth C. Straight

Jack uses the idiom "hold your horses" which means to slow down. Look at the examples below and try to think of an idiom that you or your family uses.

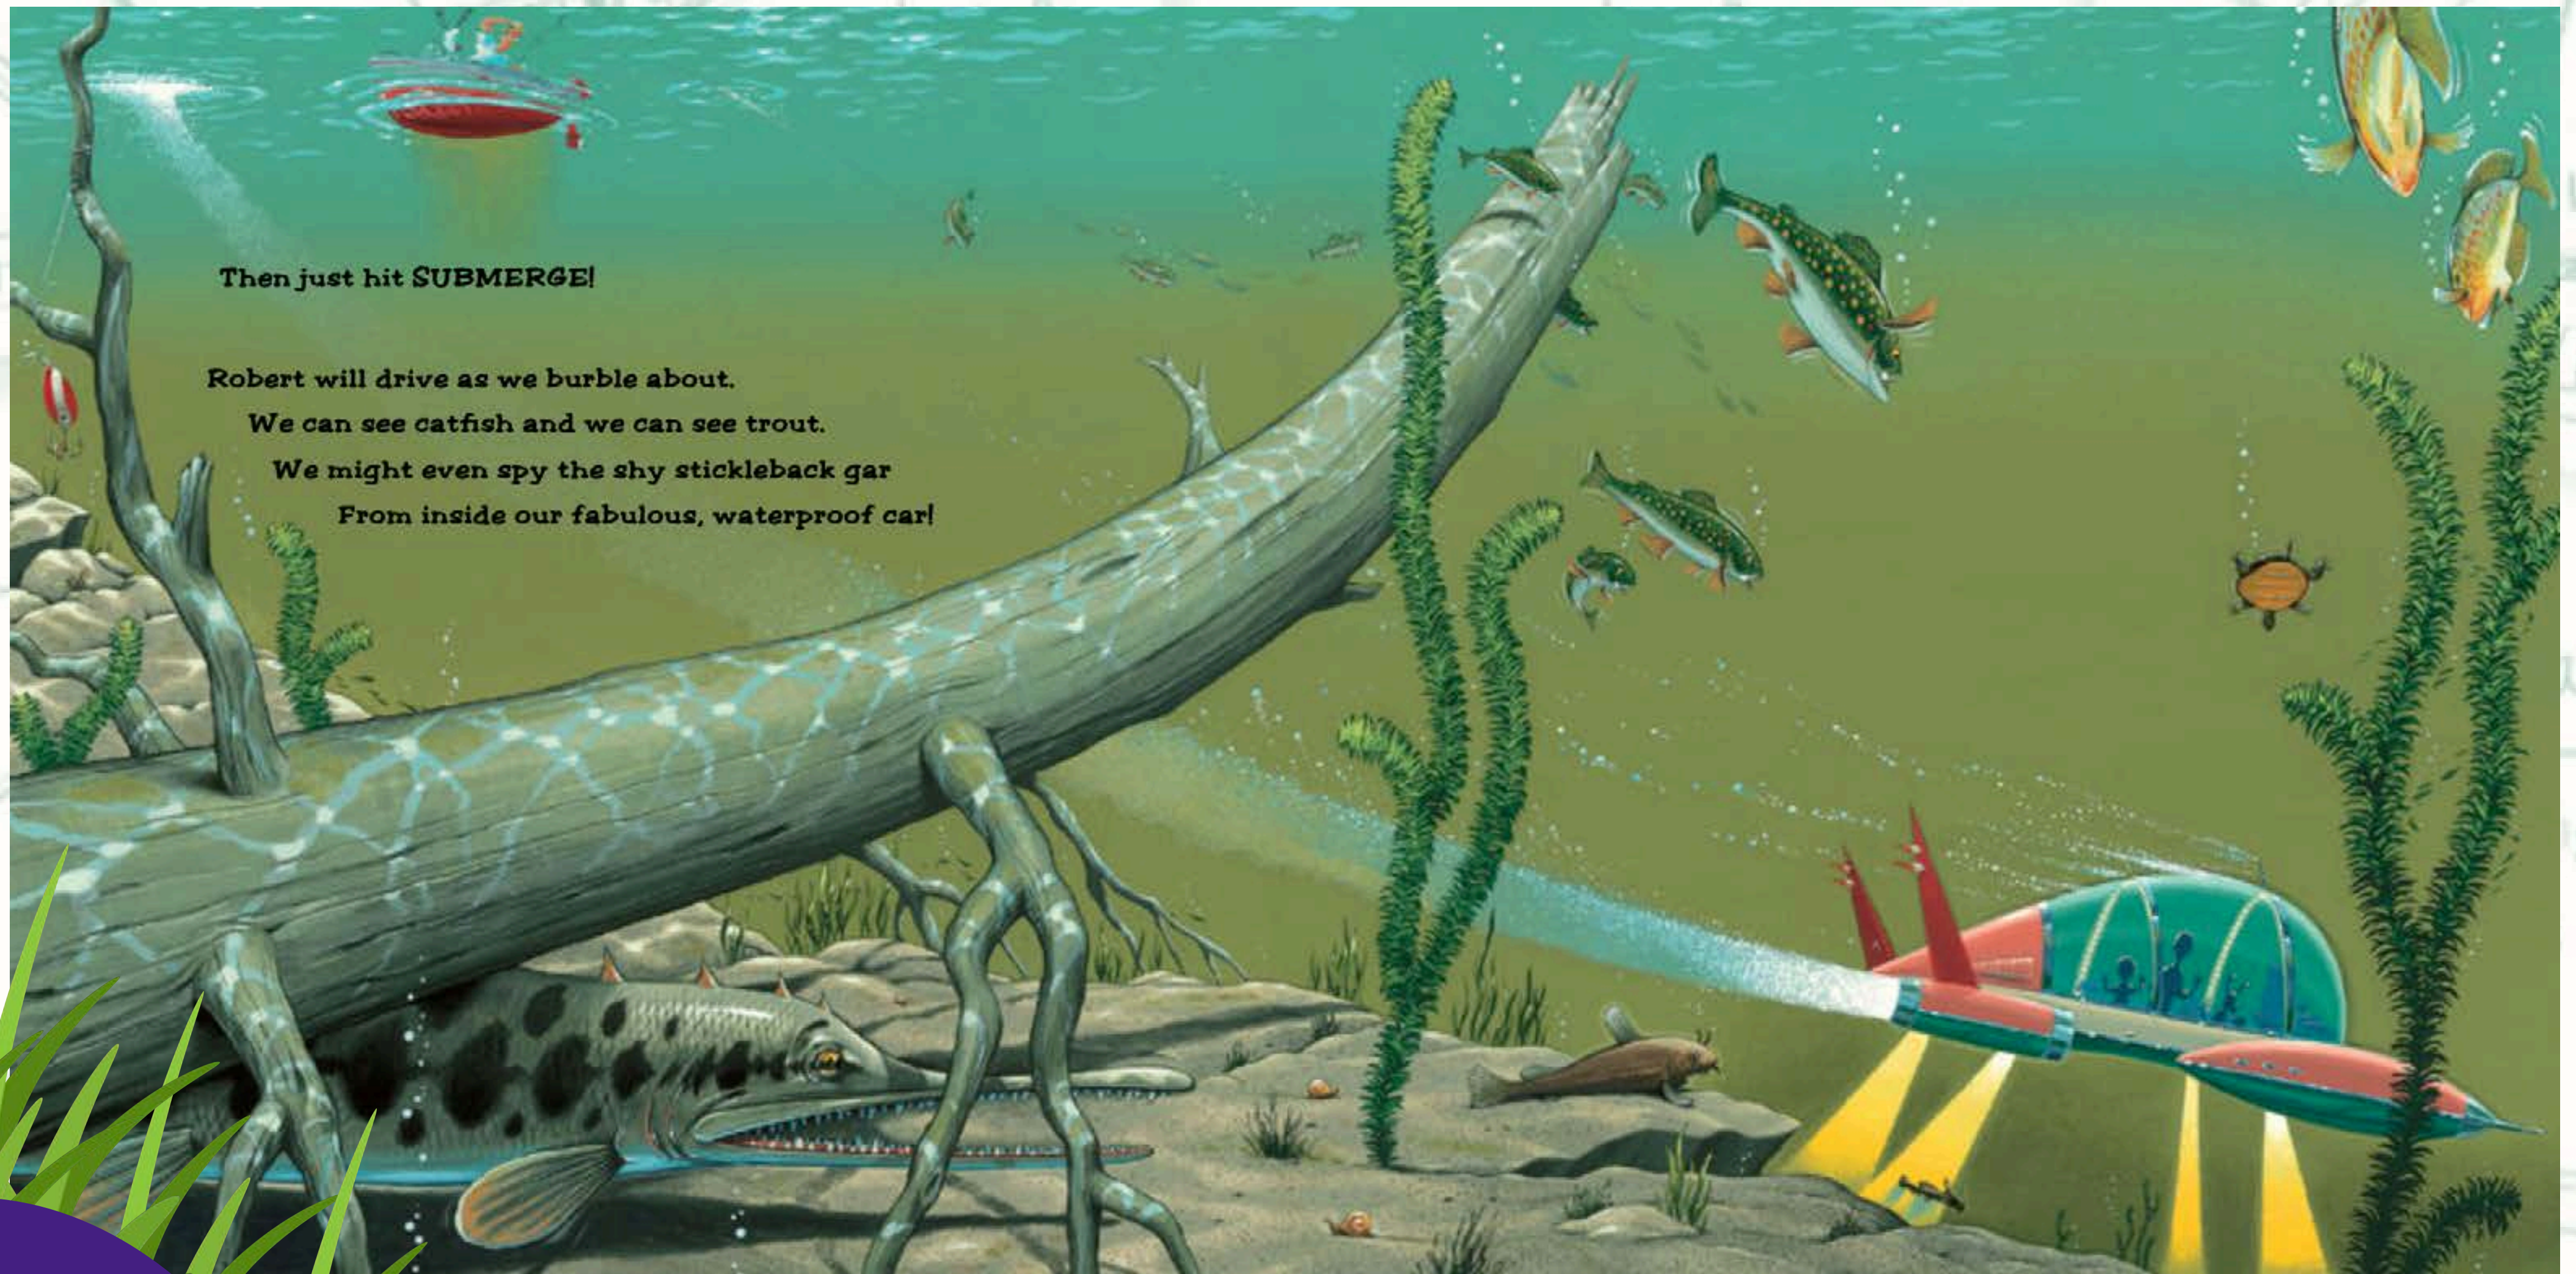

8

Break
A Leg

Under the
Weather

Wish Someone
Good Luck

To
Feel Ill

9

Catfish, trout and stickleback gar are 3 different species or types of fish. What other type of fish can you name?

Last but not least, the best feature of all
Comes down to a button that's shiny and small.
Push it and then, in the wink of an eye,
The car will take off! We'll be up in the sky!

10

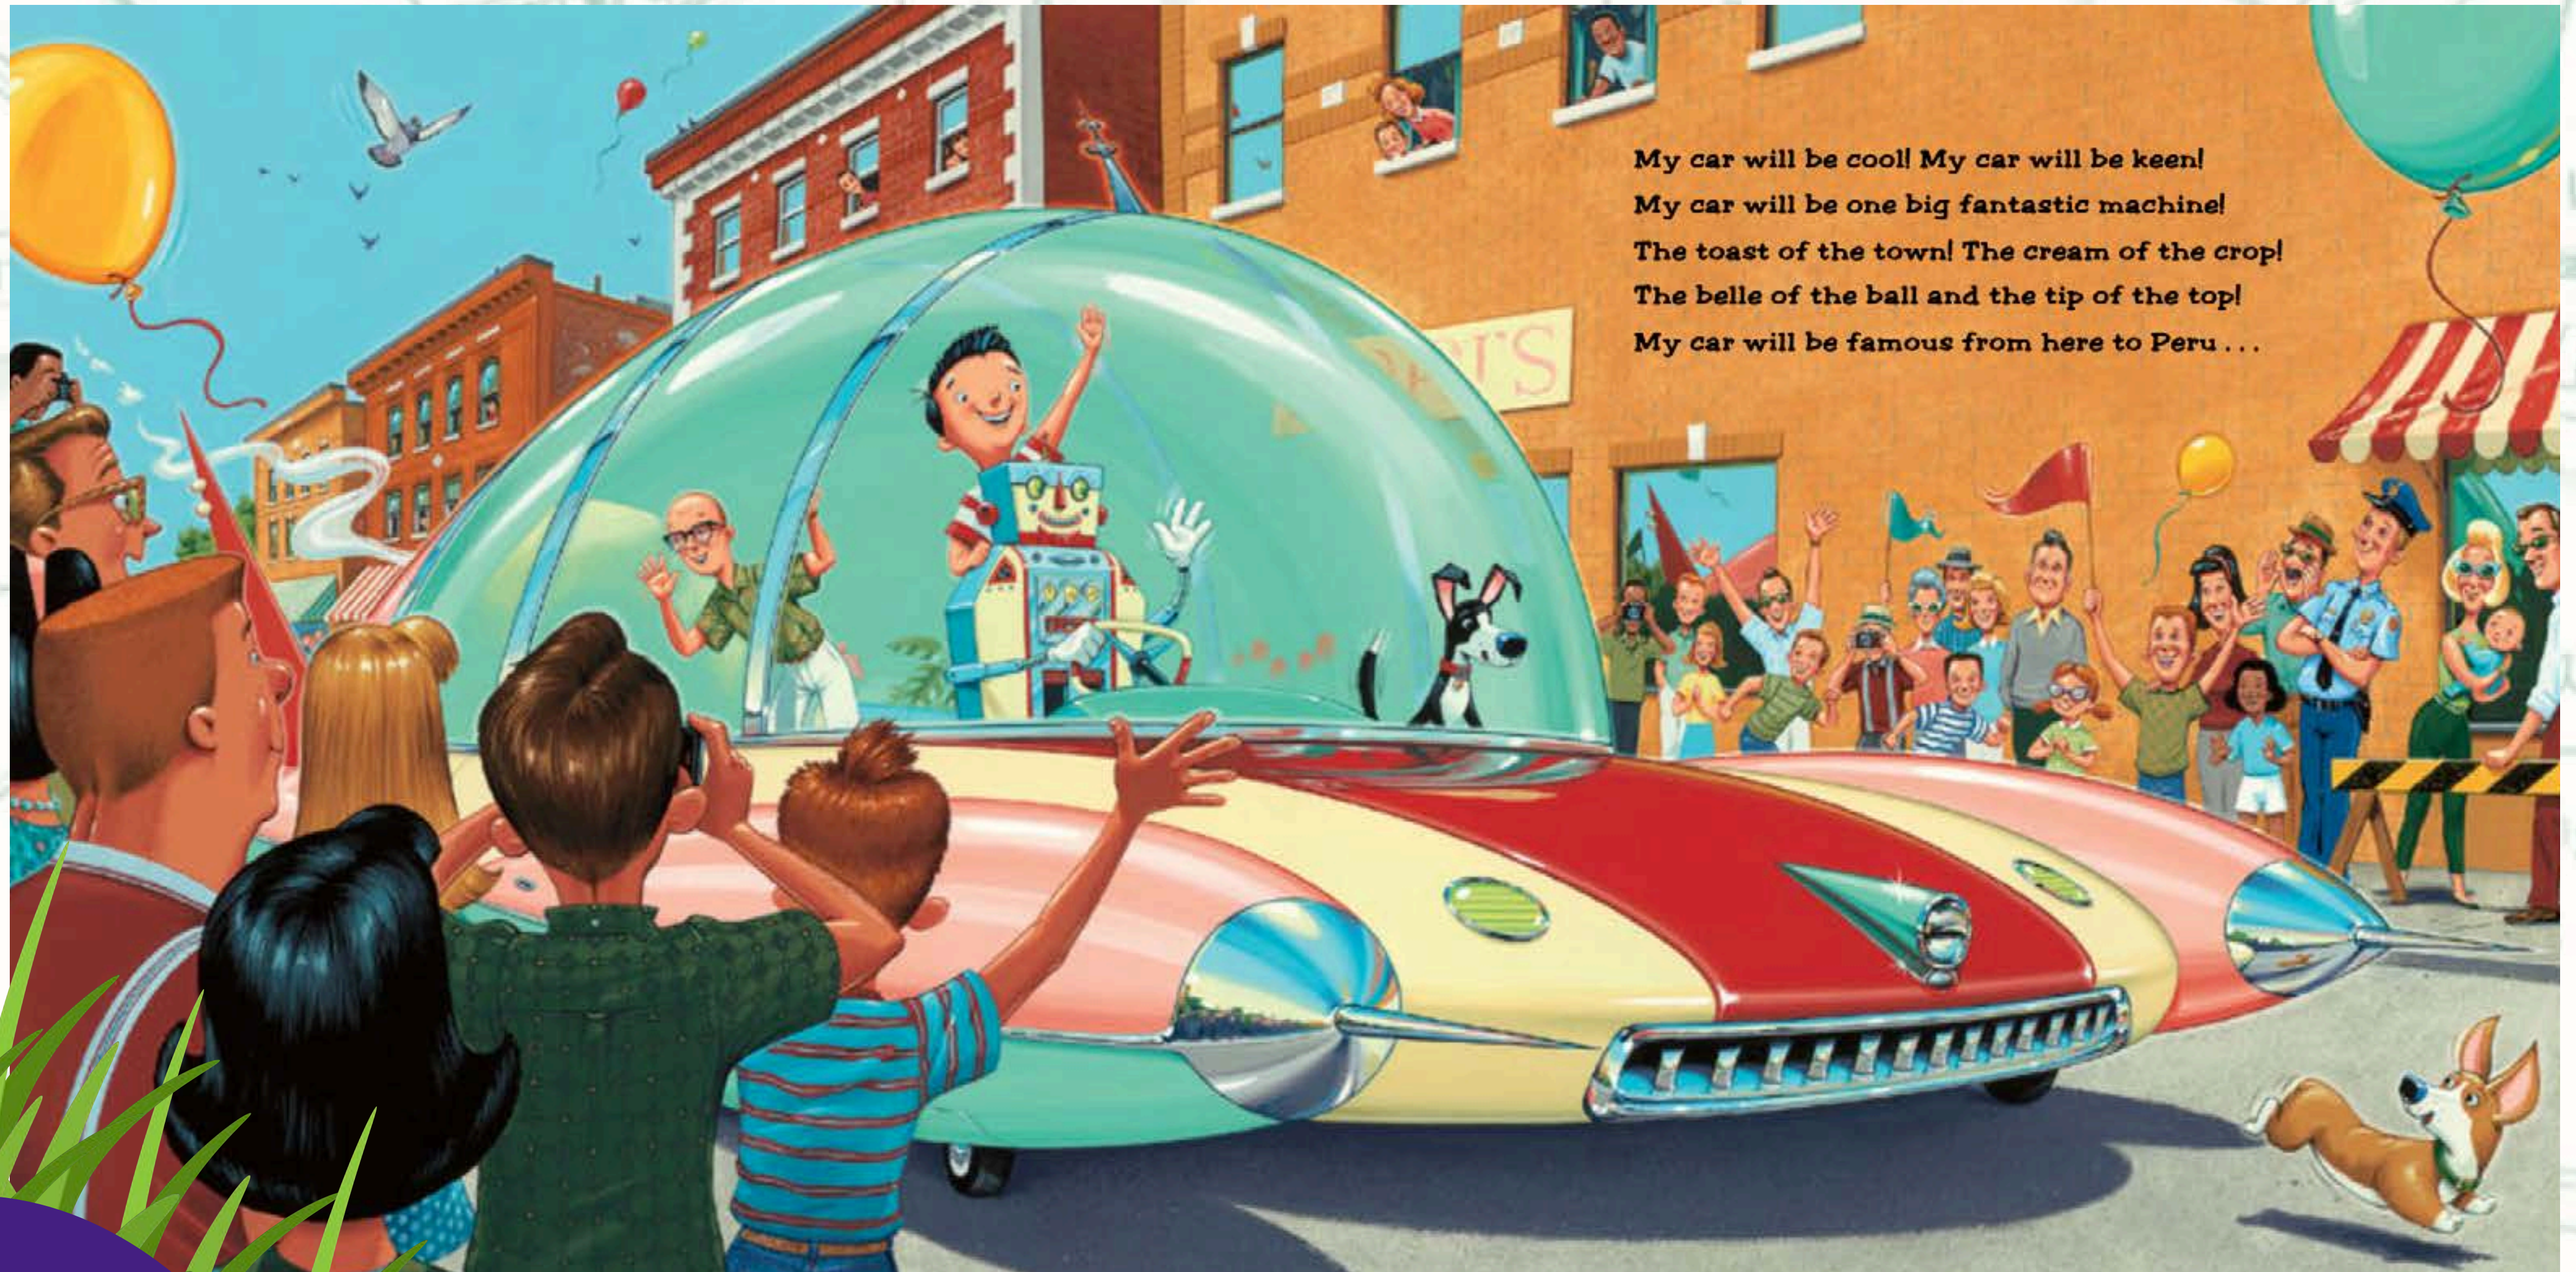

Jack's car has several different buttons.
Name 3 objects that also have buttons.

We'll fly over land! We'll fly over seas!
To Alaska, Nebraska, Bermuda, Belize,
Or take a vacation when things start to freeze
And fly us all down to the Florida Keys.

11

Jack's car will fly over seas. The synonym for the word "sea" is _____
Alaska, Nebraska & Florida are 3 of the 50 _____ in our country.

12

The United States is located on the continent of North America.
The country of Peru is located on the continent of _____ America.

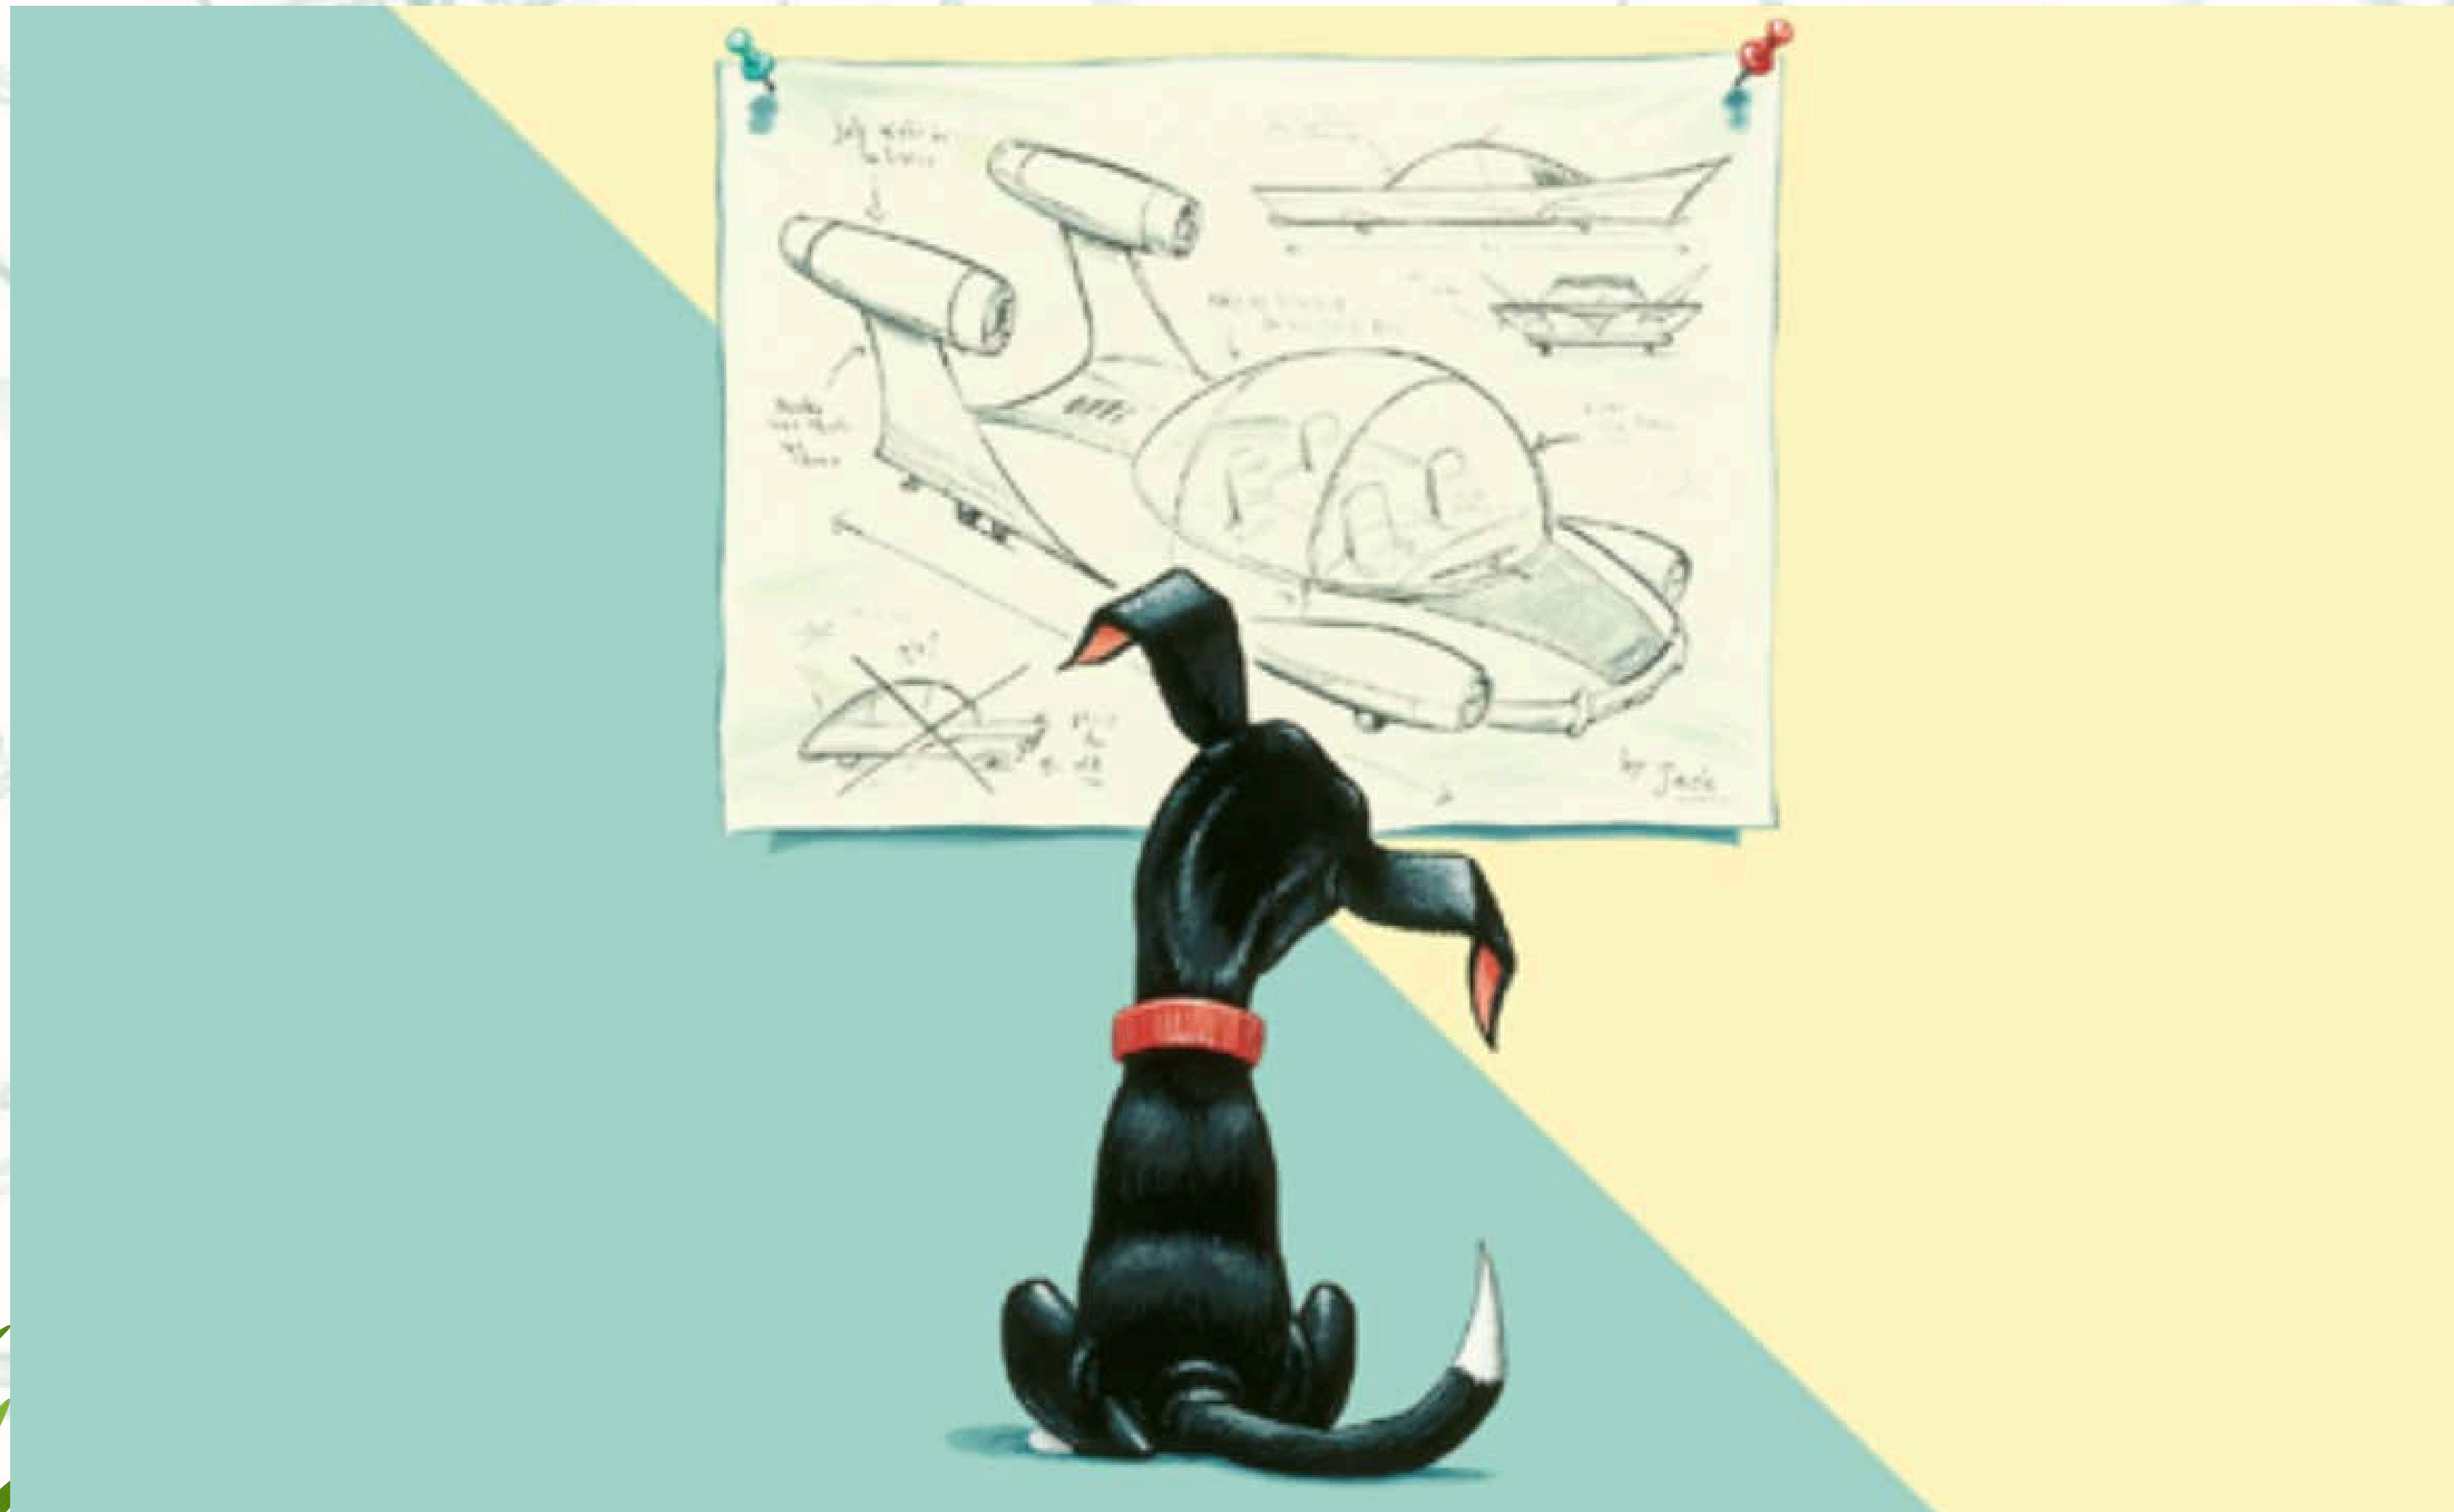

If I built a car, that's just what I'd do!

13

If YOU built a car, what kind of car would YOU build?

15
